**CERI Commodity Reports (available to CERI sponsors free of charge; available to non-sponsors for \$1,500 each per year)**

*CERI Commodity Report – Natural Gas* is a monthly publication that examines near-term North American natural gas market fundamentals. Coverage includes the key drivers of natural gas activity, supply, demand, and storage, as well as weather expectations, and their impacts on natural gas prices. The report comments on a broad range of elements: active rig count, well licensing, completions, production volumes, Canadian system receipts, LNG imports, energy commodity prices, and so on. The basic elements are consistent from issue to issue. Additional topical articles and reports vary with the marketplace annual cycle, gas industry activity, impacts of other energy sectors, and global issues affecting North American natural gas.

*CERI Commodity Report – Crude Oil* is an original, thought provoking monthly publication focusing on short-term developments (including geopolitical ones) in the world oil market, as well as issues impacting the oil market in the longer term. The outlook section provides information and analysis pertaining to the oil market up to eight quarters into the future. This includes forecasted (and historical) supply, demand and inventory information, comparisons with other organizations’ forecasts, information pertaining to OPEC behavior and the forward market, as well as CERI’s oil price forecast. The Data Appendix provides in-depth information on the world, US and Canadian oil markets.
